

Press release Calendar Week 25/I

When the little ones make it big Rameder solves Yaris drivers' transport problems three times over

Always a space to park the car, low fuel consumption, attractive price... There are many good reasons to opt for a small car like the latest Toyota Yaris. But what is working well in everyday life, may become a problem during your next family holiday. Small cars do not easily accommodate four people and their luggage. But **Rameder**, Europe's leading provider of automotive transport solutions, does, of course, have the right solution for this car as well. At www.rameder.eu customers can even choose between different towbars.

All versions provide a bearing load of 75kg and a trailer load of 1,200kg. Thus **Rameder** allows you to tow not only a rather large bicycle rack but also a real transport trailer or a small caravan. It only takes 2 hours to mount the rigid towbar with its screwed-on bowl head, which, including a 13-pole electrical kit, costs Euro 214. At www.rameder.eu the removable alternative with a bowl bar inserted from behind costs Euro 304 including the electrical kit. The new **Rameder** trio for the Toyota Yaris is completed by another removable towbar with a very convenient automatic locking system. This set costs Euro 344.
