Ski or Snowboard – why not both?

The Rameder ski carrier WB300 Snow Mount takes in up to six pairs of ski or four boards

It is in the nature of things that luggage for skiing holidays is at least a size bigger than for summer holidays. But, where shall all the things go? The suitable solution is provided by **Rameder**. Europe's leading supplier of transport equipment offers in its online shop www.rameder.eu the Ski and Snowboard Carrier **WB300 Snow Mount** at Euro 199 for this case. The high-quality system scores with its broad supporting surface of 72 cm. Thus, six pairs of ski or four snowboards can be transported without any problems, mounted safely on the vehicle's roof.

WB300 combines high transport potential an attractive and above all aerodynamically favourable design. This reduced the additional fuel consumption and pleases penny pinchers. The uncomplicated handling speaks in favour of the new carrier system as well. The scope of delivery includes two different attachments: The T nut connection ensures a seamless contact to the roof rack system, and the universal components for a quick installation to the crossbars. Indeed, the installation takes a few minutes only. The locks also supplied make sure in addition that the expensive winter sports equipment is protected against thieves.

WB300 Snow Mount is another clever transport solution from the comprehensive range of **Rameder**. And as soon as the sports equipment is stored away safely, an additional pair of shoes or another trendy skiing jumper is no problem any longer.
