

## Press release Calendar Week 01/I

### Ski fans pleased as Punch!

#### Rameder breaks the price – an innovative ski rack for only €9.99

Skiing is expensive, especially since due to global warming ever longer distances have to be travelled to do it. But now low fuel prices and the inexpensive **Rameder** ski rack make for somewhat lower transport costs. Europe's largest provider of transport accessories for cars has the innovative and purist single rack available at [www.rameder.eu](http://www.rameder.eu) for only €9.99, no more than the price of a Wiener Schnitzel up there in the mountains.

And the **ski rack** is perfectly easy to handle: screw it on top of the base rack, put some skis in, fix them with the rubber band and secure it all by applying the locking lever. If need be, you can also fix more than one **ski rack** to the base rack. The product is very suitable for sporty singles, to go with a roof box, as a flexible extension of a larger rack or to keep it in reserve, just in case you take someone with you skiing.
