

## Press release Calendar Week 16/I

### Don't worry!

#### EasySpair fixes car tyres and is a convenient compressor for leisure activities

EasySpair is really a set for drivers of small or medium-sized cars to repair punctures, but it also has many other uses. No matter where there has been a puncture, the EasySpair compressor is there to help. It will also fix a punctured football or lilo, for example. **Rameder**, Europe's leading provider of automotive transport accessories, has it available in its online shop at [www.rameder.eu](http://www.rameder.eu) for only €39.99.

A punctured tyre is always a nuisance, but EasySpair makes you do without a potentially dangerous change of tyres. (Only think of a very busy road...) The set with its high-performance compressor and sealant is always ready to use! Depending upon the size and the pressure inside the tyre, the sealant will patch tears of up to 6 mm in length and punctures. In statistical terms, these combined make up 95 per cent of all punctures. You can now continue your journey at a speed of up to 80 kph to reach a place where you can change the tyre without risk.

But that's not all. Thanks to the powerful compressor with its manometer, EasySpair can also be used on balls, lilos, paddling pools, motorbikes or bicycle tyres. And the highly recommended air pressure checks can now be run at home. You don't have to go to the petrol station.

For a safe transport, **Rameder** will deliver the set in a high-quality black cloth bag. The 2.8 m cable with its 12 V plug can be stored in the casing, where you will also find an air outlet. The set comes with various valve adapters.
