

Press release Calendar Week 21/I

Summertime is 'round the corner! Be equipped with Rameder's battery chargers

Mobile homes, caravans and camping vans are now awakening from hibernation. In order to have full power on the road or if the battery has to be charged in the first place, **Rameder** offers various [battery chargers](#). And they come rather inexpensively...

Even modern lead acid batteries need some maintenance, but you will find many instructions on how to store them in winter on the web. The right equipment in form of battery chargers, however, can be bought from **Rameder's** online shop at www.rameder.eu. 1.2 – 120 Ah batteries should be charged with the [Charge Box 3.6](#) (€85). Such batteries comprise car, small moped and scooter batteries. Those bikes are very convenient anyway, if you want to be mobile out there and leave your caravan parked.

For mobile homes and caravans, you rather need the [Charge Box 7.0](#) (€139) for 14 Ah - 230 Ah. Both battery chargers come with extensive accessories and can be used for all 12V lead acid batteries (also GEL and AGM). You can monitor the charging process on an LED display. And the micro-processor-controlled process is very precise and thus gentle on your battery...

For other useful automotive products, you can also check out the **Rameder Shop** at www.rameder.eu.
