An extra for the “docker”

Rameder with versatile towbars for the Dacia Dokker Express

You always give your all, don't you?! But the spacious Dacia Dokker Express's cargo volume ends at 3,300 or 3,900l, depending upon the version. However, if you use a **Rameder** towbar, these data are no longer valid. At www.rameder.eu, Europe's largest provider of automotive transport solutions features both fixed and removable models for the Dokker Express and its siblings. You can also get them as sets with a 13-pole electrical kit and an adapter.

In many trades, plans need to be flexible. You must avoid idle times and use transport capacities efficiently and effectively. You can do this by using the right trailer, which can “dock” at the smart Dacia: be it a pick-up, box, covered trailer or a small flatbed trailer or a mobile working platform ...

But you won't only find towbars in the **Rameder Online Shop**. The right accessories for towbars and everything to do with bike carriers can be easily navigated and found. Thus, **Rameder** turns the Dacia Dokker and other models into flexible all-rounders that will rise to any challenge.
