

PRESS RELEASE 2020 – WEEK 17

Definitely no “Bulli-ing”!

Rameder presents high-quality towbars for the new VW T6.1

“Busfest” in England is the world’s largest event for VW Transporter owners. Whether it will take place this September is still uncertain due to the coronavirus crisis. But not to worry, because the “Bulli” Transporters prefer to be everyday heroes anyway. The latest generation 6.1 has recently been launched. And of course there are a lot of modern extras available. Anyone who was so excited when ordering their VW T6.1 that they forgot to tick the box for the towbar can now rectify this with Rameder – and at a bargain price, too. Customers can choose between several clever variants at www.rameder.eu.

Probably no other commercial vehicle is met with as much emotion as the VW Transporter. This is quite surprising, as the attractively designed Transporter was initially inspired by something as functional as the “VW Plattenwagen” flat-bed truck. Anyone who has ever seen one of these crude utility vehicles will hardly have developed a “must-have-one” reflex. The VW Transporter is a completely different story – whether the rounded original version, the angular T3 or the latest high-tech T6.1, whose name sounds more like a software update. Just like its predecessors, it is of course not a show-off vehicle but rather quite the workhorse. With a **Rameder** towbar, it can even take on an additional 2.8 tons. The cheapest variant is the rigid towbar – 7pin electric kit included. It features an impressive vertical load of 120 kg, which also makes the clever towbar ideal for various carrier systems: several heavy e-bikes or even a lightweight motorcycle are possible. To find the product in the Online Configurator, simply enter “T6”, as it fits both generations.

Owners who prefer a more elegant solution can of course buy a detachable towbar for their VW T6 or T6.1 from **Rameder** – with identical technical specifications. This also includes the 7pin electrical kit.
